

Protecta-Line Barrier Pipe 39

For water supply through contaminated ground, the tough multi-layer construction ensures all contaminants remaining cannot permeate into the water supply.

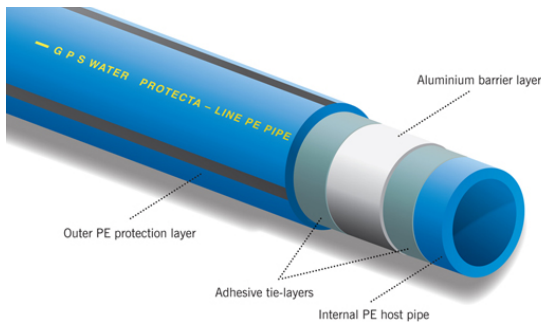

Code	Description	Diameter	Length
25X25PL	25mm x 25m Protecta-Line Barrier Pipe - Blue	25mm	25M
25X50PL	25mm x 50m Protecta-Line Barrier Pipe - Blue	25mm	50M
32X25PL	32mm x 25m Protecta-Line Barrier Pipe - Blue	32mm	25M
32X50PL	32mm x 50m Protecta-Line Barrier Pipe - Blue	32mm	50M
63X25PL	63mm x 25m Protecta-Line Barrier Pipe - Blue	63mm	25M
63X50PL	63mm x 50m Protecta-Line Barrier Pipe - Blue	63mm	50M

Larger diameter & straight lengths of Protecta-Line pipe available upon request.

Full range of couplers, bends, reducing sets & junctions available at Rupipe.

The multi-layer construction of Protecta-Line pipes incorporates an impermeable aluminium barrier layer wrapped onto a central core of PE80 or Excel (PE100) pipe.

This prevents the ingress that would be caused by throughwall permeation of hydrocarbons and related chemicals that might be present in contaminated / brownfield land.

Competitive pricing, reliability you can trust
